

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### FPM Funds Stockpicker Germany Small/Mid Cap – share class I, a sub-fund of FPM Funds

WKN / ISIN: DWS1K8 / LU1011670111

The fund is managed by Universal-Investment-Luxembourg S.A. (the "management company").

#### Objectives and investment policy

The objective of the investment policy is to achieve the maximum performance.

To accomplish this aim, the sub-fund invests at least 75% of its assets in shares from issuers in an EU member state, Norway or Iceland. In addition, the sub-fund can also invest in instruments such as share certificates, convertible bonds, convertible loans, option bonds, participation certificates, coupons and subscription warrants in securities as well as in variable interest and fixed-interest securities. At least 51% of the sub-fund is invested in instruments from German issuers. The sub-fund focuses on German shares in "small to mid-caps", which refers to market capitalisations of up to 10 billion euros.

The sub-fund may employ derivative financial instruments such as forwards, futures, single stock futures and options for investment and hedging purposes.

Within this scope, the choice of the individual assets is performed by the investment manager of the sub-fund.

Income of the sub-fund shall be distributed; the sub-fund may pay interim dividends.

Investors may, in general, redeem their shares with the management company on each trading day, i.e. each entire bank working day in Luxembourg and in Frankfurt am Main. The fund may, however, suspend redemptions when extraordinary circumstances exist which, taking into consideration the interests of the shareholders, make a suspension appear necessary.

**Recommendation: This sub-fund may not be appropriate for investors who plan to withdraw their money within a period of less than 7 years.**

#### Risk and reward profile

This indicator relies on historic data and cannot be used for a prediction of future developments. The categorisation of the sub-fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The sub-fund has been placed in category 6 because its share value fluctuates strongly and therefore the chance of profit but also the risk of loss can be high.

It may be that due to the calculation model not all risks are accounted for when placing the sub-fund in a risk category. An extensive description of the risks is included in the section "Risks of Investment" in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the sub-fund:

- Credit risks: The sub-fund may invest a part of its assets in debt securities issued by governments or companies. The issuers of these debt securities may become insolvent which may result in the partial or full loss of the value of their debt securities.
- Risks from the use of derivatives: The sub-fund may use derivatives for the purposes described above under "Objectives and Investment Policy". This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the sub-fund.
- Custody risks: The custody of assets, particularly abroad, may involve a risk of loss arising from the possibility that the custodian or sub-custodian becomes insolvent, breach duties of due care or engages in abusive conduct.
- Operational risks: The sub-fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.

## Charges

One-off charges taken before or after you invest:

**Entry charge / Exit charge: 0.00% / 0.00%**

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the sub-fund over the year:

**Ongoing charge: 1.21%**

Charges taken from the sub-fund under certain specific conditions:

**Performance fee: The performance fee corresponds to 15% of the sum by which the performance of the shares exceeds the performance of the composite index of the MDAX® (38%), SDAX® (38%) and TecDAX® (24%), from the start of each financial year to the end of the financial year (the calculation period). In the past financial year, this excess return amount to 4.02%.**

The ongoing management and custody of the sub-fund's assets as well as the distribution of the shares are financed through the fees and other costs. Arising costs decrease the chances of return for the investor.

The ongoing charge mentioned here was incurred in the preceding financial year of the sub-fund which ended in December 2017. The ongoing charge may vary from year to year. The ongoing charges figure does not include Performance fees and charges for the purchase and sale of assets (Portfolio transaction costs). The annual report for each financial year includes details of the exactly calculated costs. Further information about costs can be found in the Section "Administrative and other Costs" in the prospectus.

## Past performance

**Past performance is not a guarantee for the future.**

**In this calculation, all costs and fees with the exception of the entry charge have been deducted.**

**The sub-fund was set up on 20.12.2004, this unit class was launched at 22.04.2014.**

**The past performance was calculated in Euro.**
